

# Verification & Integrity Note

## Evaluating Free AI Chatbots on Civic and Human Rights Topics: A 15-Country Expert Study

Media and Journalism Research Center (MJRC)

Publication Year: 2026

DOI: <https://doi.org/10.5281/zenodo.18661316>

---

### Document Integrity

This report has been finalized and archived by the Media and Journalism Research Center (MJRC). To ensure transparency and document integrity, the cryptographic hash of the final published PDF is provided below.

#### SHA-256 Hash (Final Version):

D65CE571A20C63406479FD681DAA1526B98A352BE28A7B82F92C842B988ED588

Any alteration to the document — including formatting, punctuation, or content — will result in a different hash value.

### How to Verify

- 1 Download the official PDF file from [journalismresearch.org](http://journalismresearch.org) or from the Zenodo record associated with the DOI above.
- 2 Generate a SHA-256 hash using any trusted hashing utility (e.g., QuickHash, shasum, OpenSSL).
- 3 Confirm that the resulting hash exactly matches the value listed in this document.

If the values match, the document is authentic and unaltered.

### Transparency Statement

This study was conducted using a structured expert review methodology across 15 countries. All data, scoring protocols, and methodological explanations are documented in the full report. The cryptographic hash above guarantees that the version cited, downloaded, or archived remains identical to the officially released version.
